

1. Install 2 x AAA alkaline batteries
2. Click "Add new device" under "System > Setting > Bluetooth and device" on your PC
3. Press and hold the center and right buttons (see illustration) at the same time for 4 – 6 seconds to put the device into pairing mode
4. On your PC select either "WetKeys Mouse" or "SaniType Mouse" to connect the mouse

Connection must be established within 80 seconds. If the connection fails, repeat steps 2 through 4.

If the mouse is not moved and no buttons are used for 10 minutes or longer, the mouse will go into "Hibernate" mode. To reestablish connection, press any button once.

To disconnect the device from your PC, press and hold the center and right buttons (see illustration above) at the same time for 4 – 6 seconds, the mouse will automatically disconnect from your PC. To re-connect to your PC, repeat steps 2 – 4.
